

REPAIR & REGROW

The PalinGen Membrane is a powerful tissue graft used for wound care and surgical applications. Below are some benefits of the PalinGen Membrane:

- Biological and physical overlay to cover and protect the wound.
- Recruits local stem cells to rebuild and regrow the granulation tissue for proper wound closure.
- Accelerates the wound healing process and reduces scar tissue formation.

Growth Factor Rich

The PalinGen Membrane is a chorion-free allograft and contains key growth factors and extracellular matrix proteins that are known to aid in the healing of wounds and support the regeneration of healthy native tissue.

Wound Care

After debridement, the PalinGen Membrane is applied directly on the wound. Within 1 to 2 weeks, the PalinGen Membrane will be incorporated into the wound - improving it's size and depth.

Donation Source

The PalinGen Membrane is obtained during full-term cesarean births from healthy donors who have volunteered their placenta and amniotic fluid. Donation does not require fetal

"In 2 weeks, my patient's wound showed complete closure and improved muscle strength. "

- Dr. David Iaccino, DPM

Anti-Inflammatory

The PalinGen Membrane contains anti-inflammatory and anti-fibrotic proteins that help reduce pain, swelling, and scar tissue formation.

Anti-Microbial

The PalinGen Membrane is considered anti-microbial, killing or inhibiting the growth of micro-organisms. This further reduces patient rejection and the risk of infection within the wound.

Sterilization Process

Our proprietary sterilization process ensures product sterility without terminal irradiation, maintaining the original biological makeup of the membrane.

Insurance Coverage

The PalinGen Membrane is covered by both Medicare and commercial insurances. Consult your physician for more information.

Donor Screening

All PalinGen Membranes are collected aseptically and tested prior to processing and are determined to be eligible for transplantation by Donors Suitability Standards established by the AATB and FDA.

FDA Regulated

Our products are regulated under 21CFR Part 1271 and Section 361 of the Public Health and Service Act.
